

Project Overview

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

Installation

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

ETL Data Load

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

Financial Ratios

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

Screenener

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

Peer Comparison

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

Valuation

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

Cash Flow Intelligence

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

NLP Pros and Cons

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

Clustering

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

Streamlit Dashboard

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

FastAPI Server

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

PDF Reports

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

Testing

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

Acceptance Gates

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

Troubleshooting

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

Data Definitions

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

Simulated Data Notice

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

Reproducibility

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.

Final Submission

Use the project commands and generated outputs for this module. All monetary values are INR Crore. The supplied market-cap and stock-price datasets are treated as SIMULATED as required by the project specification. Review generated CSV/XLSX/PDF artifacts after running the pipeline.
